I am a national HIPAA, HITECH Act health care expert and strategist focused on covered entities, business associates, technology companies, federal agencies including OCR, NIST and CMS, ACOs, Regional Extension Centers (RECs), Medicaid Agencies, states, and national and state trade associations.

In the past few years I developed the NIST HIPAA Security risk analysis and audit tool used across the industry. I have developed HIPAA privacy and security tools for risk analysis/assessment, audit, breach notification and HIPAA policies and procedures, plus contingency plans, disaster recovery plans, training plans and training materials used by both covered entities and business associates.

I am a co-author of a quarterly HIMSS HIPAA Privacy and Security column for the JHIM publication. I founded the Healthcare Information Report in 2006.

I had a national security and privacy leadership position for 13 years, from when I helped to found the WEDI SNIP Security and Privacy Workgroup in 2000. I teach and speak nationally and regionally numerous times a year at WEDI meetings, AHLA meetings and the HIPAA Summits and many others.

I founded my own law firm in 2002. I have 40 years of professional leadership experience spanning college teaching, biochemistry research and law. I am retired from the Commonwealth of Massachusetts, where I was a litigator in the Department of Revenue.

I received my Bachelor and Master of Science degrees in Biology from Tufts University, Medford, Massachusetts, and my law degree *cum laude* from Suffolk University Law School, Boston, Massachusetts.
